

Logo Kit

All versions of the logo are available in a variety of file formats contained in the Viridis Logo Kit.

- **PNG** files are medium resolution and suitable for Word and Powerpoint up to about 15cm wide at print resolution, or larger for websites and social media.
- **JPG** files are high resolution and suitable for use up to A3 size at print resolution.
- **EPS & PNG** files are both vector graphics and therefore fully scalable. EPS files use CMYK colour space for printing and PDF's use RGB for screen base applications.

NB: Versions of each logo are also included without the "Mining & Resources" tagline. File names for these are appended with A (eg: Viridis Logo 1A.pdf).

Logo 1 First choice for white or light coloured backgrounds

Logo 2 First choice for black or dark coloured backgrounds

Logo 3

For use on white or light coloured backgrounds where full colour reproduction is either not available or not appropriate. Shown here in black & white and single spot colour (PMS-357C)

Black & White

Single Colour

Deep Green

Screen: r27, g86, b51
Web: #1b5633

Print: c86, m40, y91, k38
Pantone®: PMS-357C

Fonts

The logo is created using an open-source Google font called Josefin Sans Bold, for both the logo and tagline.

The Josefin Sans font family is free to download and use from Google Fonts at <https://fonts.google.com/> and also includes other weights and italic versions.

Josefin Sans Bold - Bold Italic

Josefin Sans SemiBold - SemiBold Italic

Josefin Sans Regular - Regular Italic

Josefin Sans LIGHT - Light Italic

Josefin Sans THIN - Thin Italic
